

## Portability, Creativity, Efficiency

RatPac's new Satellite™ is the all-in-one Art-Net to wireless DMX transmitter, with splash resistant enclosure, tactile membrane LED buttons and a rugged micro USB connection. Connect via WIFI or plug directly into any console via RJ45. Connect multiple units and universes with the Constellation® tool.

### The Gaffer's Window:

Through the Gaffer's window, two users can operate in the same DMX universe allowing the gaffer control of specific channels without affecting the on-set programmer's work.

### Constellation:

Easily identify, Link/Unlink and configure up to 32 AKS or Satellite™ Units with a quick and simple tool. Accessible from any network-enabled device.
